

framcolor **FUTURA**[®]

COLOR COMPARISON GUIDE

Framcolor Futura **and** framesi Mixcolor Crema[®]

INTRODUCTION

Color Comparison Guide

Every color line is unique. This color conversion guide provides you with quick reference for converting your existing formulations to Framcolor Futura®. A test strand is recommended for best results. This guide is not designed to replace hands on education, which is offered to you *free of charge* as a new framesi customer.

For optimum results, use this guide in conjunction with the framesi Five Steps to Formulation:

- 1. DETERMINE THE NATURAL LEVEL (NL)**
Match the natural level of the hair using the “N” Series on the Framcolor Futura Swatch Chart.
- 2. DETERMINE THE DESIRED LEVEL (DL)**
Determine the final desired level. Is the client going darker, lighter, or staying the same color level?
- 3. DETERMINE THE TONAL VALUE OF THE DESIRED LEVEL**
The final tone results depend upon the base of the color applied and the remaining color at the desired level. Remaining color is the color the natural hair is lifted to during processing period. Remaining color is found at the desired lift level on the chart. When coloring hair, the remaining color may be enhanced or refined, depending on the base of the series applied. Refer to the “Color Wheel” and “Series/Bases” in the Framcolor Futura manual.
- 4. DETERMINE THE CORRECT DEVELOPER**
Refer to *Developer Usage Chart* on next page.
- 5. DETERMINE THE PERCENTAGE OF GRAY HAIR**
Gray hair is lacking in all three primaries. To achieve the most natural result, framesi recommends the use of the “N” or “XN” Series. When coloring 50% or more gray hair, it is necessary to add the “D” or “DS” Series to the “N” Series for optimum natural results. For more information on gray coverage, refer to “Gray Coverage” section in the Framcolor Futura manual.

For live assistance call framesi Technical Assistance at 1.800.245.6323,
Monday-Friday, 9:00 a.m. - 8:00 p.m., Saturday 10:00 a.m. - 2:00 p.m.

Mixcolor Crema® transforms Framcolor Futura® into a Tone-On-Tone,
Deposit-Only Haircolor System.

Mixcolor Crema

Mixing Application & Timing Instructions for:

Gray Blending

Mix Ratio*:

30cc Framcolor Futura®
60cc Mixcolor Crema

Instructions:

1. Mix to creamy consistency
2. Apply formula from root to end
3. Process at room temperature for 20-30 minutes
4. For a Mixcolor touch-up, apply to regrowth only, and pull through faded ends for the last 10 minutes of processing

Toning Highlights Color Refreshing/Balancing Shine Enhancer

Mix Ratio:

30cc Framcolor Futura®
30cc Mixcolor Crema
30cc framesi conditioner

Instructions:

1. Mix to creamy consistency
2. Apply formula from root to end
3. Process at room temperature for 5 - 15 minutes

For Shine Enhancer, use:

Framcolor Futura® 8DS for levels 5 & lighter,
or Framcolor Futura® 6DS for levels 4 &
darker.

"Shampoo Cap" at the Bowl

Mix Ratio

30cc Framcolor Futura®
30cc Mixcolor Crema
30cc framesi Shampoo

Instructions

1. Mix thoroughly
2. Shampoo into hair
3. Process at room temperature for 5-15 minutes, depending on desired end result

Stylist Tip:

If more conditioning is desired, the framesi **shampoo** can be replaced with the appropriate framesi **conditioner**.

NOTE: any framesi shade that appears italicised with an asterisk, is a Framcolor 2001* shade.
